

Air Guardian® - Create Clean and Healthy Air

Air Purification And Disinfection Device

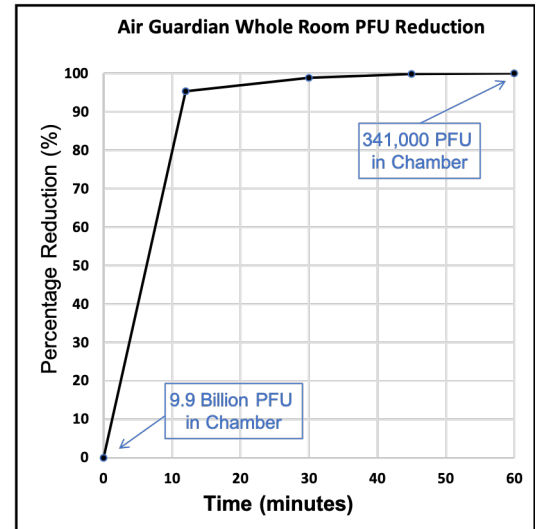

Airflow through disinfection chambers – > 9600 sq inches of reactive oxidation and UV energy up to 235,000 milli-

Features And Benefits

- Patented solution for Air Purification and Sanitization ideal for Schools, Healthcare, Senior Living, and Office Buildings.
- Long Lasting, UVA and UVC LED Technology
- Meets all regulatory guidelines of the USA, Canada, California (CARB)
- 3-5 ACH per 800 sqft with quiet operation (<45 dB) at 240 CFM
- Available in multiple fan speeds up to 400 CFM
- Provides greater than 99% sanitization
- Offers substantial odor reduction of body odor, feces, urine, cooking and other annoying odors.
- Made in the USA. Available for Drop Ceiling or Surface mount.
- The Air Guardian Plus offers a combination unit with downlighting, air disinfection, and surface decontamination.

Regulatory Compliance

- FDA Establishment Number: 3017489474
- Compliant with all CDC Guidelines for UVGI (Ultraviolet Germicidal Irradiance) Devices
- EPA Product Establishment Number: 9810S-TX-1
- This product is a device that does not contain any pesticidal ingredients and does not require an EPA registration number.
- FDA Product Use Classification: Medical Device Class 1 Listing #D420497
- FDA Updated Product Use Classification - Class II Device - granted through FDA 880.6500 exemption

This test was used to determine the efficacy of the Air Guardian® in removing viable viral PFU, in vast numbers, over a short period of time. As shown here, Air Guardian® has already killed 95% of nearly 10 billion PFUs in the very first 12-minute sampling and almost 100% at 30 minutes

Superior Air Quality Safeguards Healthy Learning and Living Environments
